TechnoCom Corp. to be Named One of the Los Angeles' Fastest Growing Technology Companies in Deloitte Technology Fast 50 Program

LOS ANGELES, Calif.—August 4, 2004—TechnoCom Corp., a leading provider of wireless location Operations Support System (OSS) and Business Support System (BSS) solutions, will be named to Deloitte's prestigious Technology Fast 50 Program for Los Angeles, a ranking of the 50 fastest growing technology companies in the area by Deloitte & Touche LLP, one of the nation's leading professional services firms. Scheduled to be announced September 21, Technology Fast 50 rankings are based on the percentage of growth in fiscal year revenues over five years, from 1999–2003.

TechnoCom's chief executive officer Mario Proietti credits several factors to the company's rapid five-year growth: the increasing desire of wireless carriers and enterprise solution providers around the world to streamline their operations, generate new service revenues, enhance productivity and grow their subscriber base. The wireless location segment of the Operations and Business Support Systems market has emerged with TechnoCom leading the sector.

Proietti commented on the Fast 50 ranking, stating: "We are pleased to be recognized for the second time by Deloitte as one of Los Angeles' fastest growing technology companies. This year, while remaining focused on the successful development and deployment of innovative carrier and enterprise wireless location OSS/BSS solutions worldwide, we have significantly advanced our business through new product introduction, securing of financing and forging of relationships and customers spanning Europe, Asia and Latin America. We are honored that Deloitte has

carefully examined our growth, acknowledged our successes and included us again in their prestigious competition.”

To qualify for the Technology Fast 50, companies must have had operating revenues of at least \$50,000 in 1999 and \$1,000,000 in 2003, must be public or private companies headquartered in North America, and be a "technology company" defined as owning proprietary technology that contributes to a significant portion of the company's operating revenues (using other companies' technology in a unique way does not qualify); and/or devoting a significant proportion of revenues to research and development of technology.

“The Deloitte Los Angeles Technology Fast 50 companies have shown the strength, vision and temerity to succeed despite a very challenging technology environment,” said Tim Lovoy, Deloitte partner, Technology, Media & Telecommunications practice, Los Angeles. “We applaud the successes of TechnoCom and acknowledge their place as one of the very few to accomplish such a fast growth rate over the past five years.”

Winners of the 19 regional Technology Fast 50 programs in the United States and Canada are automatically entered in the Deloitte Technology Fast 500 program, which ranks North America’s top 500 fastest growing technology companies.
