TECHNOCOM ENABLES AWARD-WINNING FLEET MANAGEMENT SOLUTION FOR TIME WARNER CABLE

Los Angeles, CA -July 7, 2005—TechnoCom Corporation®, a leading provider of solutions to enable wireless location services and assure their ongoing performance, today announced that Time Warner Cable, Inc. was honored with the M2M Magazine's Value Chain Gold Award, its highest award category for fleet management solutions. TechnoCom was recognized as one of the value chain technology providers that enabled the successful implementation of Time Warner Cable's machine-to-machine (M2M) solution. The Value Chain Awards were announced at the M2M United Conference in Chicago on June 28, 2005.

Through technology provided to Time Warner Cable by Sapias, Inc, TechnoCom supplied the versatile mobile location platform that enabled a complete M2M solution, optimizing Time Warner Cable's management of their extensive mobilized work forces. The solution utilizes TechnoCom's Location Messaging Unit (LMU), GPS enabled communication devices, and Programmable Event Generator™ (PEG™), an intelligent on-board, rules-based alert engine that monitors and reacts to equipment conditions and proactively generates events and alert messages. The LMU utilized in this solution includes Kyocera's 200 module, which enables an expansive array of M2M and telemetry applications.

TechnoCom's technology helps enable the innovative Cable Leak Detection Analysis application for Time Warner. This system automates previously costly and time intensive RF emission leakage checks required by the federal government. In place of field staff drive testing and manually recording leaks, Time Warner Cable vehicles

equipped with TechnoCom LMUs and leak detection devices automatically record and report RF emission leaks and their severity.

The Value Chain Awards were chosen by a group of industry analysts from Aberdeen, ARC Advisory Group, Gartner, Harbor Research, as well as the editors of M2M magazine.

About TechnoCom Corporation

TechnoCom is a leading provider of solutions to enable wireless location services and assure their ongoing performance. TechnoCom offers a portfolio of location performance assurance, mobile resource management, advanced telematics solutions and related professional services to network operators, service providers, system integrators and government agencies. These solutions enable customers to manage their wireless and location infrastructures and services, reduce operating and capital costs, increase productivity, and rapidly deploy new revenue-generating services. Founded in 1995, TechnoCom was named one of the 50 fastest-growing technology companies in Los Angeles by Deloitte & Touche for the past three years. The company's customers include some of the world's largest wireless carriers and integrators including, among others, Alltel, ARINC, Cingular, Cricket Communications, Raytheon, SAIC, Sprint Nextel, SunCom Wireless, Telefonica Empresas S.A., Telus, T-Mobile, and Verizon. TechnoCom has received investments from Timeline Ventures, Titan Investment Partners, Third Point Management and iSherpa Capital. For more information, please visit www.technocom-wireless.com
