TECHNOCOM'S VICE PRESIDENT OF EXTERNAL AFFAIRS ELECTED TO E9-1-1 INSTITUTE BOARD OF DIRECTORS

Janice Partyka Elected to Represent Institute in its Mission to Enhance Wireless E9-1-1 Services

Los Angeles, CA, USA – October 21, 2004 – TechnoCom Corporation®, a leading provider of wireless location Operations Support Systems (OSS) and Business Support Systems (BSS) solutions, announced today that Janice Partyka, vice president of external affairs, has been elected to the board of directors of the E9-1-1 Institute. E9-1-1 provides local emergency response agencies with the location of wireless callers who dial 9-1-1.

The Washington, D.C.-based E9-1-1 Institute is a non-profit organization that supports the E9-1-1 congressional caucus in its mission to elevate emergency communications issues within all branches of government, and ensure 911 networks and operators are properly funded. The caucus is led by Senator Conrad Burns (R-Mont.), Senator Hillary Clinton (D-New York), Representative Anna G. Eschoo (D-Calif.), and Representative John Shimkus (R-Ill.). The E9-1-1 Institute aids the caucus by providing education on policy issues that impact wireless 9-1-1 services. It also serves as a forum for discussion and debate while fostering consensus among issue stakeholders.

Along with Partyka, the E9-1-1 Institute named 12 other Board members; four of which are permanent, non-elected positions. These Board members comprise some of the top companies within the wireless and telecommunications industries as well as important public safety officials.

“I am pleased to serve on the E9-1-1 Institute’s Board of Directors to work with industry and public safety officials to improve implementation of E9-1-1. I join many veteran industry professionals on the board, and am confident that together we will continue to make progress in helping resolve outstanding issues in meeting the FCC’s E911 mandate,” Partyka said.

Partyka brings over 15 years of wireless and technology experience to her Board role. She works actively as a member of multiple industry associations and governmental organizations on wireless 9-1-1 issues including the FCC's Network Reliability Issues Committee (NRIC), the National Emergency Number Association (NENA), the Association of Public Safety Communication Officers (APCO) and the Emergency Services Interconnection Forum (ESIF).

About TechnoCom Corporation

TechnoCom is the leading provider of wireless location Operations Support System (OSS) and Business Support System (BSS) solutions. TechnoCom offers carriers and enterprise solution providers a portfolio of wireless location service management products, carrier-grade middleware and a full suite of wireless enterprise solutions. These products enable customers to manage and leverage their wireless location infrastructures and services, reduce operating and capital costs, deliver superior levels of service, increase productivity, and rapidly deploy new revenue-generating services. Founded in 1995, TechnoCom has built a world-class team and reputation for domain leadership in location technology, wireless communications and location-based OSS and BSS. The company's customers include some of the world's largest wireless carriers and integrators including, among others, Alltel, ARINC, AT&T Wireless, Nextel, Raytheon, SAIC, Sprint, Telefonica de España, Telefonica Empresas S.A., Telus, T-Mobile, Triton PCS and Verizon. With offices in Los Angeles and San Diego, California, TechnoCom was named one of the 50 fastest-growing technology companies in Los Angeles by Deloitte & Touche for the past two years. TechnoCom has received investments from Timeline Ventures, Titan Investment Partners, Third Point Management and iSherpa Capital. For more information, please visit www.technocom-wireless.com.
