SCC Communications' New Alliance with TechnoCom Corporation Alliance Enhances SCC's End-to-End Wireless Phase II Solution

FOR IMMEDIATE RELEASE

Boulder, Colo. (June 7, 2000)—SCC Communications Corp. (Nasdaq: SCCX) today announced an alliance agreement with TechnoCom Corporation, a leading provider of engineering and product development services in the wireless data and location industries. SCC is the largest provider of enhanced 9-1-1 (E9-1-1) database management services in the wireless and wireline marketplace.

The new alliance strengthens SCC's Wireless Phase II solutions by leveraging the combined expertise in the field of wireless enhanced 9-1-1. "With the Federal Communications Commission (FCC) regulations requiring E9-1-1 Phase II compliance by 2001, wireless carriers need the most comprehensive solution available", said Barbara Winters, vice president and general manager of SCC Wireless business unit. "TechnoCom's expertise in location-based services enables SCC to offer wireless carriers a bundled Phase II solution, which allows the wireless call to be located within meters."

TechnoCom will work with SCC to deliver critical planning, evaluation, certification, and compliance verification services as part of the overall SCC Phase II service offering. "We are proud to incorporate our experience in location technologies and network development & deployment with SCC's E9-1-1 services," commented Mario Proietti, executive vice president of TechnoCom. "As wireless carriers work towards Phase II implementation, knowing where to start or which technology to use can be a challenge. Carriers can now call upon the team of SCC and TechnoCom to implement a Phase II solution that meets their needs, regardless of the location technology," he stated.

Winters added, "We are very pleased to announce the alliance with TechnoCom. As part of SCC's ongoing commitment to deliver innovative and reliable solutions to our customers, the

alliance with TechnoCom strengthens our Phase II solution and ability to meet the market's needs."

About SCC

SCC Communications, Corp. (Nasdaq: SCCX) is the largest provider of 9-1-1 data management services to incumbent local exchange carriers (ILECs), competitive local exchange carriers (CLECs), integrated communications providers (ICPs) and wireless carriers in the United States. SCC manages the data that allows routing of 9-1-1 calls to the appropriate answering point and delivers accurate information about the caller's location with the call. SCC provides 9-1-1 services to 12 leading wireless telecommunications carriers and 33 leading wireline telecommunications carriers. SCC currently manages the records for approximately 90 million wireline telephone subscribers, including 3.6 million CLEC subscribers, and over 838,000 revenue-generating wireless subscribers. The company also develops innovative, value-added information technology systems and software products for the public safety industry.
