## **TECHNOCOM RECEIVES SPRINT NEXTEL CERTIFICATION FOR LMU-4000 SMART UNIT AND PLATFORM FOR MOBILE RESOURCE MANAGEMENT**

**LOS ANGELES, Calif.—March 31, 2006** —TechnoCom Corporation®, a leading provider of solutions to enable wireless location services and assure their ongoing performance, announced today that Sprint Nextel has certified its LMU-4000™ for use on both their CDMA and iDEN® networks. This certification provides TechnoCom's customers with further flexibility and added choices in deploying their vehicle tracking solutions.

The LMU family of smart GPS and messaging devices for mobile resource management has been deployed in vehicles across the Americas and Europe. TechnoCom's customers rely on the LMU's built-in intelligence to develop solutions that distinguish themselves in the markets they serve, including transportation, logistics, dispatch, government, and field services.

"Whether adding features, certifying new networks, or expanding over-the-air capabilities, TechnoCom continues to advance the LMU product line," says Greg Thompson of ThomTech Design, which is currently deploying LMUs over the Sprint network for the city of Denver. "With versions of the LMU-4000 available for each major network, it's easier for me to sell to municipal customers who have a specific network preference."

John Wise of InSpatial, an emergency medical dispatch and tracking service provider, adds, "TechnoCom's commitment to flexible and reliable hardware makes them

an excellent partner. Our customers have been impressed by their products' dependability and accuracy, so much, in fact, that we were recently asked to replace an incumbent installment with TechnoCom's iDEN LMU-4000."

The LMU-4000, CDMA version, can be seen at the Kyocera booth (number 5312) at the CTIA Wireless 2006 Conference in Las Vegas, April 5 through 7.

### **About TechnoCom Corporation**

TechnoCom is a leading provider of solutions to enable wireless location services and assure their ongoing performance. TechnoCom offers a portfolio of location performance assurance, mobile resource management, advanced telematics solutions and related professional services to network operators, service providers, system integrators and government agencies. These solutions enable customers to manage their wireless and location infrastructures and services, reduce operating and capital costs, increase productivity, and rapidly deploy new revenue-generating services. Founded in 1995, TechnoCom was named for the past three years as one of the 50 fastest-growing technology companies in Los Angeles by Deloitte & Touche. The company's customers include some of the world's largest wireless carriers and integrators including, among others, Alltel, ARINC, Cingular, Cricket Communications, Raytheon, SAIC, Sprint Nextel, SunCom Wireless, Telefonica Empresas S.A., Telus, T-Mobile, and Verizon. TechnoCom has received investments from Timeline Ventures, Titan Investment Partners, Third Point Management and iSherpa Capital.
