TechnoCom Teams with Compaq to Provide Full Location Based Service Solutions to Worldwide Wireless Carriers

ENCINO, Calif. – January 16, 2002 - TechnoCom Corporation®, the leading provider of integration, deployment and operations support software, tools and services for wireless E9-1-1 and Location Based Services (LBS), today announced that it has teamed with Compaq Computer Corporation to provide wireless carriers worldwide with comprehensive LBS solutions. TechnoCom is working with Compaq to provide carriers with system assessment, design, integration and deployment services in combination with Compaq's Discovery Location Solution which is based on QUALCOMM's gpsOne™ and SnapTrack™ position location technology, SignalSoft's Wireless Location Services®, and Compaq's scalable and highly available NonStop™ Himalaya™ platform.

“We are very pleased to be working with Compaq, a global leader in telecommunications solutions, to provide carriers with a full set of LBS solutions. We are leveraging our leadership position as the industry's preferred integrator for QUALCOMM's industry leading SnapTrack and gpsOne position location solutions in the work we are doing with Compaq,” says Masoud Motamedi, President of TechnoCom Corporation. “Our team

provides a fast track for carriers to offer wireless E9-1-1 and revenue-producing location services including location sensitive billing and concierge-type services such as identification of nearby amenities, location-based traffic and weather, location-oriented entertainment, and navigational assistance.”

Mitesh Desai, Vice President, Compaq Telecom Solutions, said, "TechnoCom brings unique and valuable expertise that complements Compaq's own professional services capabilities. Our partnership creates a very attractive team for customers who need full end-to-end installation, integration and implementation of location based services solutions."

Building upon Compaq’s location-based platform, the TechnoCom/Compaq team will be providing all integration and deployment services for full operation, including Assessment Services for Technical Feasibility, Transition & Implementation Planning, System Integration & Location Technology Deployment, Interoperability & Compliance Verification, System Provisioning & Service Activation and Operational Maintenance & Support.

Compaq delivers comprehensive solutions that help global service and equipment providers enhance their existing and next-generation networks. With lengthy experience as a carrier-grade partner, Compaq has the highly available, scalable platforms, the global professional services, and the network-based wireline and wireless applications, which it

integrates into ready-to-deploy solutions. Compaq works with more than 200 communications companies, including the largest 50 in the world.

Headquartered in Encino, California, TechnoCom Corporation provides systems engineering services, software and products that enable location for a rapidly expanding range of global wireless applications. TechnoCom is a privately owned company that was founded in 1995.

Four of the top five U.S. carriers are relying on TechnoCom to help implement their wireless E9-1-1 and location-based services. TechnoCom offers a blend of services and tools to accelerate system design, reduce implementation and deployment complexity, and assure successful ongoing operations. TechnoCom's LocationSafe™ tool set, a powerful suite of tools for the integration, deployment, testing and operations of wireless location systems, significantly speeds E9-1-1 and LBS execution.

TechnoCom also provides hardware and software solutions based on its LM Exchange™ platform for use in GPS-based location applications such as telematics, fleet management, mobile commerce, public safety and asset tracking. TechnoCom is led by a team that helped pioneer wireless location technology and has deployed and operated location systems around the world. Visit <http://www.technocom-wireless.com>.

QCT (www.cdmatech.com), a division of QUALCOMM Incorporated, is a developer and supplier of CDMA chipsets, hardware and software solutions, and tools, with 175 million

cumulative shipments of MSM chips worldwide. QCT offers wireless position location technology by SnapTrack™, a wholly owned subsidiary of QUALCOMM. QCT supplies chipsets to the world's leading CDMA handset and infrastructure manufacturers.

QUALCOMM Incorporated (www.qualcomm.com) is a leader in developing and delivering innovative digital wireless communications products and services based on the Company's CDMA digital technology. The Company's business areas include CDMA chipsets and system software; technology licensing; the Binary Runtime Environment for Wireless™ (BREW™) applications platform; Eudora® e-mail software; digital cinema systems; and satellite-based systems including portions of the Globalstar™ system and wireless fleet management systems, OmniTRACS® and OmniExpress®. QUALCOMM owns patents that are essential to CDMA wireless telecommunications standards that have been adopted or proposed for adoption by standards-setting bodies worldwide. QUALCOMM has licensed its essential CDMA patent portfolio to more than 100 telecommunications equipment manufacturers worldwide. Headquartered in San Diego, Calif., QUALCOMM is included in the S&P 500 Index and is a 2001 FORTUNE 500® company traded on The Nasdaq Stock Market® under the ticker symbol QCOM.
