TRITON PCS PURCHASES TECHNOCOM'S LOCATEPREDICT PLATFORM TO OPTIMIZE LOCATION INFRASTRUCTURE

Los Angeles, CA, USA —March 24, 2005—TechnoCom Corporation®, a leading provider of wireless location Operations Support Systems (OSS) and Business Support Systems (BSS), today announced that Triton PCS, a leading operator of wireless services, has purchased the LocatePredict™ platform to optimize the deployment of its wireless location infrastructure.

The optimization and planning software will allow Triton PCS to cost effectively deploy its network-based E911 location technologies to yield the optimal accuracy performance based on the Federal Communications Commission's (FCC) E911 mandate.

LocatePredict is a wireless location system design and planning platform for GSM and TDMA that supports a range of network and handset-based location technologies including TDOA, AOA, E-OTD and RF signature systems, as well as hybrids of these technologies. It provides the user with easy-to-grasp graphical predictions and quantitative statistics based on rigorous models and extensive verification through empirical field testing.

LocatePredict allows Triton PCS to reliably predict the coverage and accuracy performance of the location technologies it has deployed for Phase II E911, and optimize the deployment and associated costs of the location technology infrastructure within the Triton PCS network.

“We anticipate LocatePredict's well-honed modeling platform will enable us to significantly reduce our deployment costs,” says Shawn Phillips, Federal Mandates

Manager of Triton PCS. “With an attractive ROI, LocatePredict allows us to more cost effectively meet our performance criteria.”

“TechnoCom focuses on delivering products and services that put greater control of costs and overall performance of location infrastructure into the hands of wireless carriers,” adds Masoud Motamedi, president of TechnoCom. “Triton PCS has once again demonstrated its innovative approach and technical leadership in solving the challenges of Phase II E911 deployment.”

About TechnoCom Corporation

TechnoCom is the leading provider of wireless location Operations Support System (OSS) and Business Support System (BSS) solutions. TechnoCom offers carriers and enterprise solution providers a portfolio of wireless location service management products, carrier-grade middleware and a full suite of wireless enterprise solutions. These products enable customers to manage and leverage their wireless location infrastructures and services, reduce operating and capital costs, deliver superior levels of service, increase productivity, and rapidly deploy new revenue-generating services. Founded in 1995, TechnoCom has built a world-class team and reputation for domain leadership in location technology, wireless communications and location-based OSS and BSS. The company’s customers include some of the world’s largest wireless carriers and integrators including, among others, Alltel, ARINC, AT&T Wireless, Nextel, Raytheon, SAIC, Sprint, Telefonica de España, Telefonica Empresas S.A., Telus, T-Mobile, Triton PCS and Verizon. With offices in Los Angeles and San Diego, California, TechnoCom was named one of the 50 fastest-growing technology companies in Los Angeles by Deloitte & Touche for the past two years. TechnoCom has received investments from Timeline Ventures, Titan Investment Partners, Third Point Management and iSherpa Capital.
